

I'm Iulian, a highly motivated graduate with a passion for technology. I am looking for a place to gain more soft skills and develop. While I enjoy working with others, when I was studying I developed my skills in communicating with and helping other people. This is why I would like to gain more experience to build myself up and believe that this position will help me. Since I know that you must be busy I have made the rest of the CV in a bullet point style. You can find a lot more information and detail about me on my website.

Education

I have studied computer science at **Queen Mary University of London** and graduated with a Bachelor of Science with Honours. I have also studied Mathematics and Computer Science at **Ada, National College for Digital Skills**. For more information visit the website I made.

Work Experience

- Sept. 2023 - May 2025 **Demonstrating :**
Demonstrated "Object Oriented Programming" and "Algorithms and Data Structures" modules, debugging code, explaining theories, and providing guidance.
- Sept. 2025 - Now **JB Tutors:**
I tutor many subjects such as Maths, English, Science, Computer science and more. The level for each subject has a wide range with me tutoring up to A level.

Projects

- Around 2017 **Anne Frank Exposition :**
Participated in an exposition where I told the story of Anne Frank to students, teachers and parents.
- Sept. 2019 - June 2021 **Mentoring:**
Helped and guided new students with anything I could.
- Sept. 2020 - June 2021 **Industry Experience Projects:**
Participated in four 3-day projects with Deloitte, Bank of America, Salesforce, and King Games, taking on roles like project manager and data analyst.
- Annual event **GMTK Game Jam :**
Participated in the 48-hour game jams, receiving positive feedback on my games.
- June 2023 - July 2023 **Jury Foreman :**
Led the jury in a difficult trial, effectively communicating decisions to the court.
- Sept. 2023 - June 2024 **University Achievements:**
I made many things such as a game and a compiler. I have done other things like image processing and embedded systems. For more check my website.

Soft Skills

- Communication:** Participated in a debating club, group projects and was part of the jury.
- Problem solving:** This is my favourite pastime, spending time with a physical puzzle, making a puzzle game and even playing games like "While True:".
- Critical thinking:** I am constantly engaging my brain with programming as I enjoy participating in competitions like the GMTK game jams.
- Time management:** I developed this skill in multiple scenarios, with the GMTK gamejam providing the most extreme challenge in this sector as I needed to finish my game in a short time.
- Goal Oriented:** Believing that the best motivation is an easily achievable goal is how I work.
- Interests** Coding, testing, drawing, cooking, video games, problem solving, game development and more
